Subject: Yucca Mountain

Part of Records Package / Supplement / Correction

I stongly oppose the proposed dumping of nuclear wastes at Yucca Mountain. There are too many signs pointing to disaster. To start with the dispute over who really owns that land is problem enough. The U.S. has renigged on too many treaties with Native Americans, do not participate in another! The presence of a source of drinking water so close to the dump site makes it unconsenible to take the risk of contiminating that water with radioactive waste! The transportation of the waste over so many miles poses the worst possibility for danger--the producers of this waste need to STOP creating it until they can deal with it safely on site!!!! Please abandon the Yucca Mountain site now! Sincerely, Lisa Allee
